GPT-7000L Total Station

1200 Meter Reflectorless Range!

Once again Topcon brings extraordinary 1200 meter reflectorless range to our total station family...the new GPT-7000L! The combination of our revolutionary EDM technology with Windows CE and TopSURV on-board software means unbeatable performance and productivity. The 7000L delivers all the functionality and power of a hand held data collector but without the cost and hassle of external hardware and cables!

GPT-7000L Instrument Features

- 4 Models (1", 2", 3", and 5")
- Color, graphical touch screen display
- Windows CE & on-board TopSURV software
- Compact flash card slot
- Up to 5000 meter prism range
- Water/dust proof (IP54)

On-Board TopSURV Features

- Graphical, touch screen interface
- Stakeout of points, lines, offsets and curves
- Road staking
- COGO, including inverse, area, traverse & curve solutions, and more
- Standard observation routines

EDM Features

- 1200 meters prismless & 3000 meters to a single prism
- Pulse technology reliably measures accurately where others can't, such as building corners, through chain link fences, and more!
- Dual laser system delivers...
 - Narrow, focused beam for precise prismless observations
 - Broader beam for long range, high-accuracy prism measurements
 - Visible diode puts a bright, flashing spot of light exactly at the point measured and is safe in high traffic areas
